

ITDFPA/AY2024 SEMESTER 2 – MOCK PRACTICAL TEST

Course : Diploma in APPLIED AI & ANALYTICS

Competency Unit : IT1391 – Data Visualisation

Nov 2024

Time Allowed: 1 hour

**INSTRUCTIONS TO CANDIDATES**

1. This test consists of **ONE (1)** question, with multiple part-questions. You are required to answer ALL the part-questions.
2. This is an **OPEN BOOK** test.
3. Communication is **NOT** allowed during the test. Any form of communication among students via any communication channel (e.g., ChatGPT, Whatsapp, Discord, smart devices/phones) is strictly prohibited at all times.
4. Students will be liable to disciplinary action if found cheating or attempting to cheat.
5. Dataset and company logo will be given to you.
6. You are required to complete the test using Microsoft Power BI workbook and rename the workbook as **249999A\_PracticalTest** where **249999A** is your student admission number. Attach your solution workbook into the BrightSpace for submission. Only attached copy found in the BrightSpace will be graded.

Name: \_\_\_\_\_ Adm. No: \_\_\_\_\_

Module Group: \_\_\_\_\_

Wonder Mart offers a wide variety of products to their customers. Assuming that you are working as a data analyst in Wonder Mart, you are tasked to generate a report using Power BI before analysing the sales data of the company.

You will create queries based on the given dataset, **WonderMartData.xlsx**. Get the data from both worksheets (Order\_Table and Master\_Date\_Table) in the file.

### Part 1: Load data in Power BI Desktop

(8 marks)

- a. Configure the Orders query using the Transform Data function.

S/N	Task	Mark(s)
i.	In the Power Query Editor, rename the Order_Table query to Orders.	1
ii.	<p>Merge CountryCode and OrderNumber columns with '-' as a separator between them. The new column should be named Order ID.</p> <p>For example, CountryCode = CA OrderNumber = 2019-152156</p> <p>After merging the columns, the Order ID should be CA-2019-152156.</p>	2
iii.	In the Category column, there is an incorrect spelling of office supplies, replace "OfficeSupplies" with "Office Supplies".	1
iv.	<p>Change the data type of the following columns accordingly.</p> <p>OrderDate – Date ProductCost - Decimal Number</p>	1
v.	<p>Rename the following columns.</p> <ul style="list-style-type: none"> <li>OrderDate to Order Date</li> <li>ShipDate to Ship Date</li> </ul>	1

- b. Configure the Master Date query using the Transform Data function.

S/N	Task	Mark(s)
i.	In the Power Query Editor, rename the Master_Date_Table query to Master Date.	1
ii.	Choose all columns except the WeekNum column.	1

**Part 2: Model data in Power BI Desktop**

**(8 marks)**

- a. Configure the Orders Table in Model and Data View

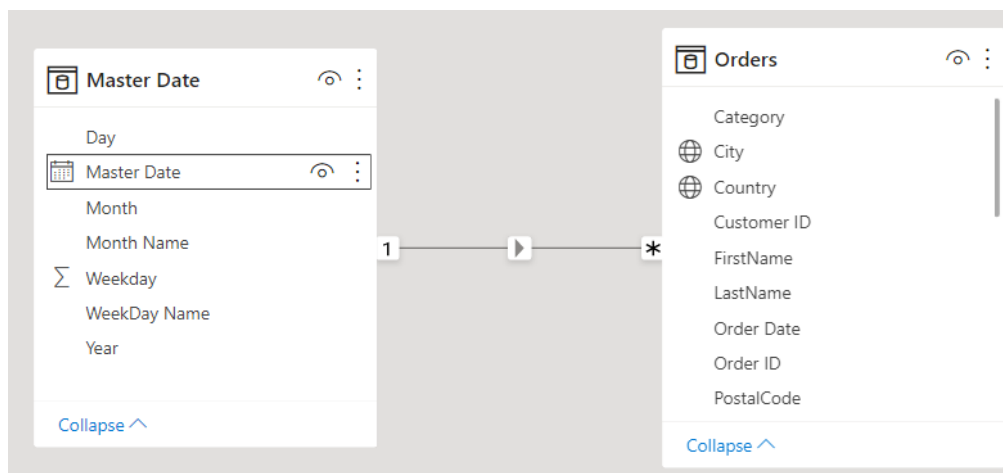

S/N	Task	Mark(s)
i.	Create a hierarchy named Location with the information provided below.  1 <sup>st</sup> Level: Country 2 <sup>nd</sup> Level: State 3 <sup>rd</sup> Level: City	2
ii.	Categorise the following two columns: <ul style="list-style-type: none"> <li>Country as Country/Region</li> <li>State as State or Province</li> <li>City as City</li> </ul>	2

- b. Configure the Master Date Table in Model View

S/N	Task	Mark
i.	Change the Summarized by setting for Year, Month and Day to None.	2
ii.	Mark Master Date table as a Date Table	1

- c. Create the following model relationships

S/N	Task	Mark
i.	<ul style="list-style-type: none"> <li>From Master Date   Master Date to Orders   Order Date</li> </ul>	1

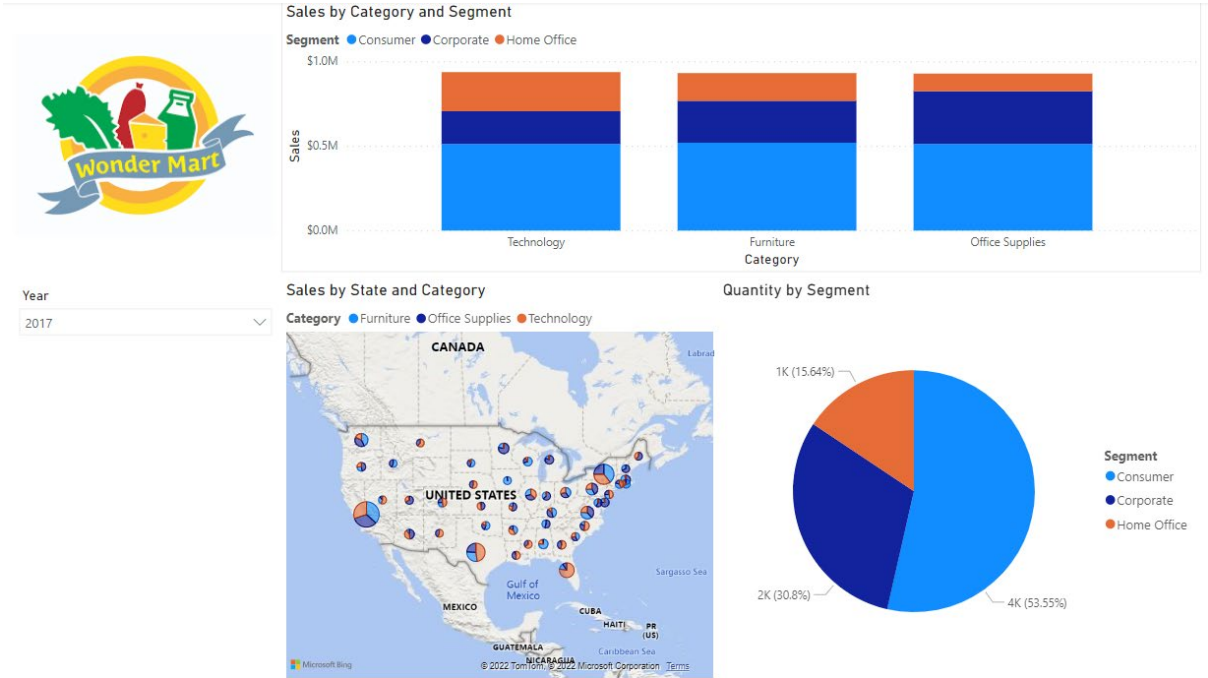

**Part 3: Create Measures****(2 marks)**

S/N	Task	Mark(s)
i.	<p>Under Report View, create a measure named Sales using the Data Analysis Expression (DAX).</p> <p>Sales can be calculated using Unit Price &amp; Quantity</p> <p>Format the value to currency format with 2 decimal places.</p>	2

**Part 4: Visualise Data in Power BI****(8 marks)**

- a. Create an Overview Page, refer to the screenshot below.

S/N	Task	Mark(s)
i.	Insert the WonderMart logo in the report.	1
ii.	Create a Year slicer to allow the user to filter the data by year. The list of years will be displayed in dropdown format and show the "Select all" option.	1
iii.	Create a visualisation to show the Sales by Category and Segment using a Stacked Column Chart.	2
iv.	Create a Map visualisation to show the Sales by State and Category.	2
v.	Create a Pie Chart to show the Quantity by Segment	2
